

Release Notes - VI Monitor Client Only Version 6.2.0

OVERVIEW

This page contains information regarding our latest development update with client VI Monitor available for [download](#) on 1/22/2015. An existing 5.5 server is required for installation.

VI Monitor

- **Snapshot Capabilities to Recorded Mode** – This will allow users to take snapshots while Recorded video is playing back.
- **Send Layout Feature** – This allows the user to select a full layout to another user in the system. This layout will appear in a new VI workspace on the user's application instantly.

- **Auto Hide Option for Left Navigational Pane** - Added the ability to hide the left panel on startup.
- **Forced Door Notification on Facility Maps** – This feature allows the user to detect when a door has been forced open on the facility map of VI Monitor. The door will appear in red when this alarm has been triggered. (*Isonas and Open Options Integrations Only*, MonitorCast.EDU support in V2)
- **Advitia Camera Property Support in VI Monitor**
 - Channel Number
 - Stream Number
 - PTZ Address
- **Advitia B5360 Improvements to dewarp algorithm**
- **Multi camera AVI Export** – This allows user to capture a layout view into an AVI export. This will allow users to export multiple camera views in a single export, single playback window.

- **50+ stability enhancements and bug fixes**
