

Release Notes – IP Server 6.2

OVERVIEW

This page contains information regarding our latest development update with IP Server 6.2 available for download on 4/3/2015. This update contains a new version of IP Server along with updated clients for Web Client and VI Monitor.

VI Monitor 6.2.6

- New and Improved IP Server including Binary Writer (BETA)
- Redesigned Diagnostics UI
- Resource Groups – This feature allow users to customize the order in which the Server lists, camera list, views and facility map appear in the Enterprise View.
 - Servers (with expanded startup option)
 - Cameras
 - Views
 - Facility Maps
- Minimized Menu for UI Option - This feature allows users to reduce the Vi Monitor ribbon size to a drop down menu based interface.
- Server Support for Extended Pre Motion Buffering - This change allows users to increase pre motion buffer up to 30 seconds.
- Camera Preview on Facility Map Setup - This feature allows users to preview a camera while setting up a facility map.

Web Client 6.2

- Active X Control Support (v. 7.0.0.2) for High Speed Mode on Internet Explorer version 9+
- Web Client Administration features including Server properties, Camera Management, and View Setup
- Bookmark Support
- Guard Tour Support
- Added preferences for default options on Web Client Modes (High and Low)
